Guest Lecture Report

The Department of Commerce (Self Finance) organized an insightful guest lecture by **Mr. Ravi Nathani**, an eminent Industry Expert, on **Saturday, 25th July 2026**, from **12:20 p.m. to 1:20 p.m.** in **F5 Classroom**. The lecture was conducted for the students of **Second Year and Third Year Financial Market** programs.

The session was attended by **60 students**, comprising **35 male students** and **25 female students**. The lecture aimed to bridge the gap between classroom learning and real-world financial market practices by providing students with practical knowledge and industry perspectives.

Mr. Ravi Nathani shared valuable insights into the **functioning of financial markets**, explaining how different market participants interact and how market movements are influenced by economic events, investor sentiment, and institutional activities. He emphasized the importance of developing a disciplined approach towards investing and trading.

A major highlight of the session was the discussion on the **Exponential Moving Average (EMA) Strategy**. The speaker explained the practical significance of the **25-day, 50-day, and 75-day EMAs** in identifying market trends and making informed trading decisions. Students learned how these moving averages help in recognizing bullish and bearish trends, support and resistance levels, and potential entry and exit points in the market.

The lecture also covered the concepts of **Fundamental Analysis** and **Technical Analysis**. While discussing Fundamental Analysis, Mr. Nathani explained the importance of evaluating a company's financial statements, earnings, management quality, industry outlook, and macroeconomic factors before making investment decisions. He stressed that long-term investment success depends on understanding the intrinsic value of a company.

In the section on Technical Analysis, the speaker demonstrated how charts, price movements, trading volumes, and technical indicators are used to predict market trends. He encouraged students to combine both **fundamental and technical analysis** for making well-informed investment decisions rather than relying solely on market speculation.

The session was highly interactive, with students actively participating in the discussion and asking questions related to trading strategies, stock selection, and career opportunities in the financial markets. The practical examples and real-time market illustrations made the lecture engaging and enhanced students' understanding of the subject.

Overall, the guest lecture proved to be an enriching learning experience. It strengthened students' knowledge of financial markets and provided practical exposure to modern investment strategies. The Department of Commerce sincerely appreciates the valuable contribution of **Mr. Ravi Nathani** for sharing his expertise and inspiring students to develop analytical and disciplined approaches toward financial market investments.
